Abantennarius nummifer

Abudefduf saxatilis

Apogon imberbis

Atherinidae

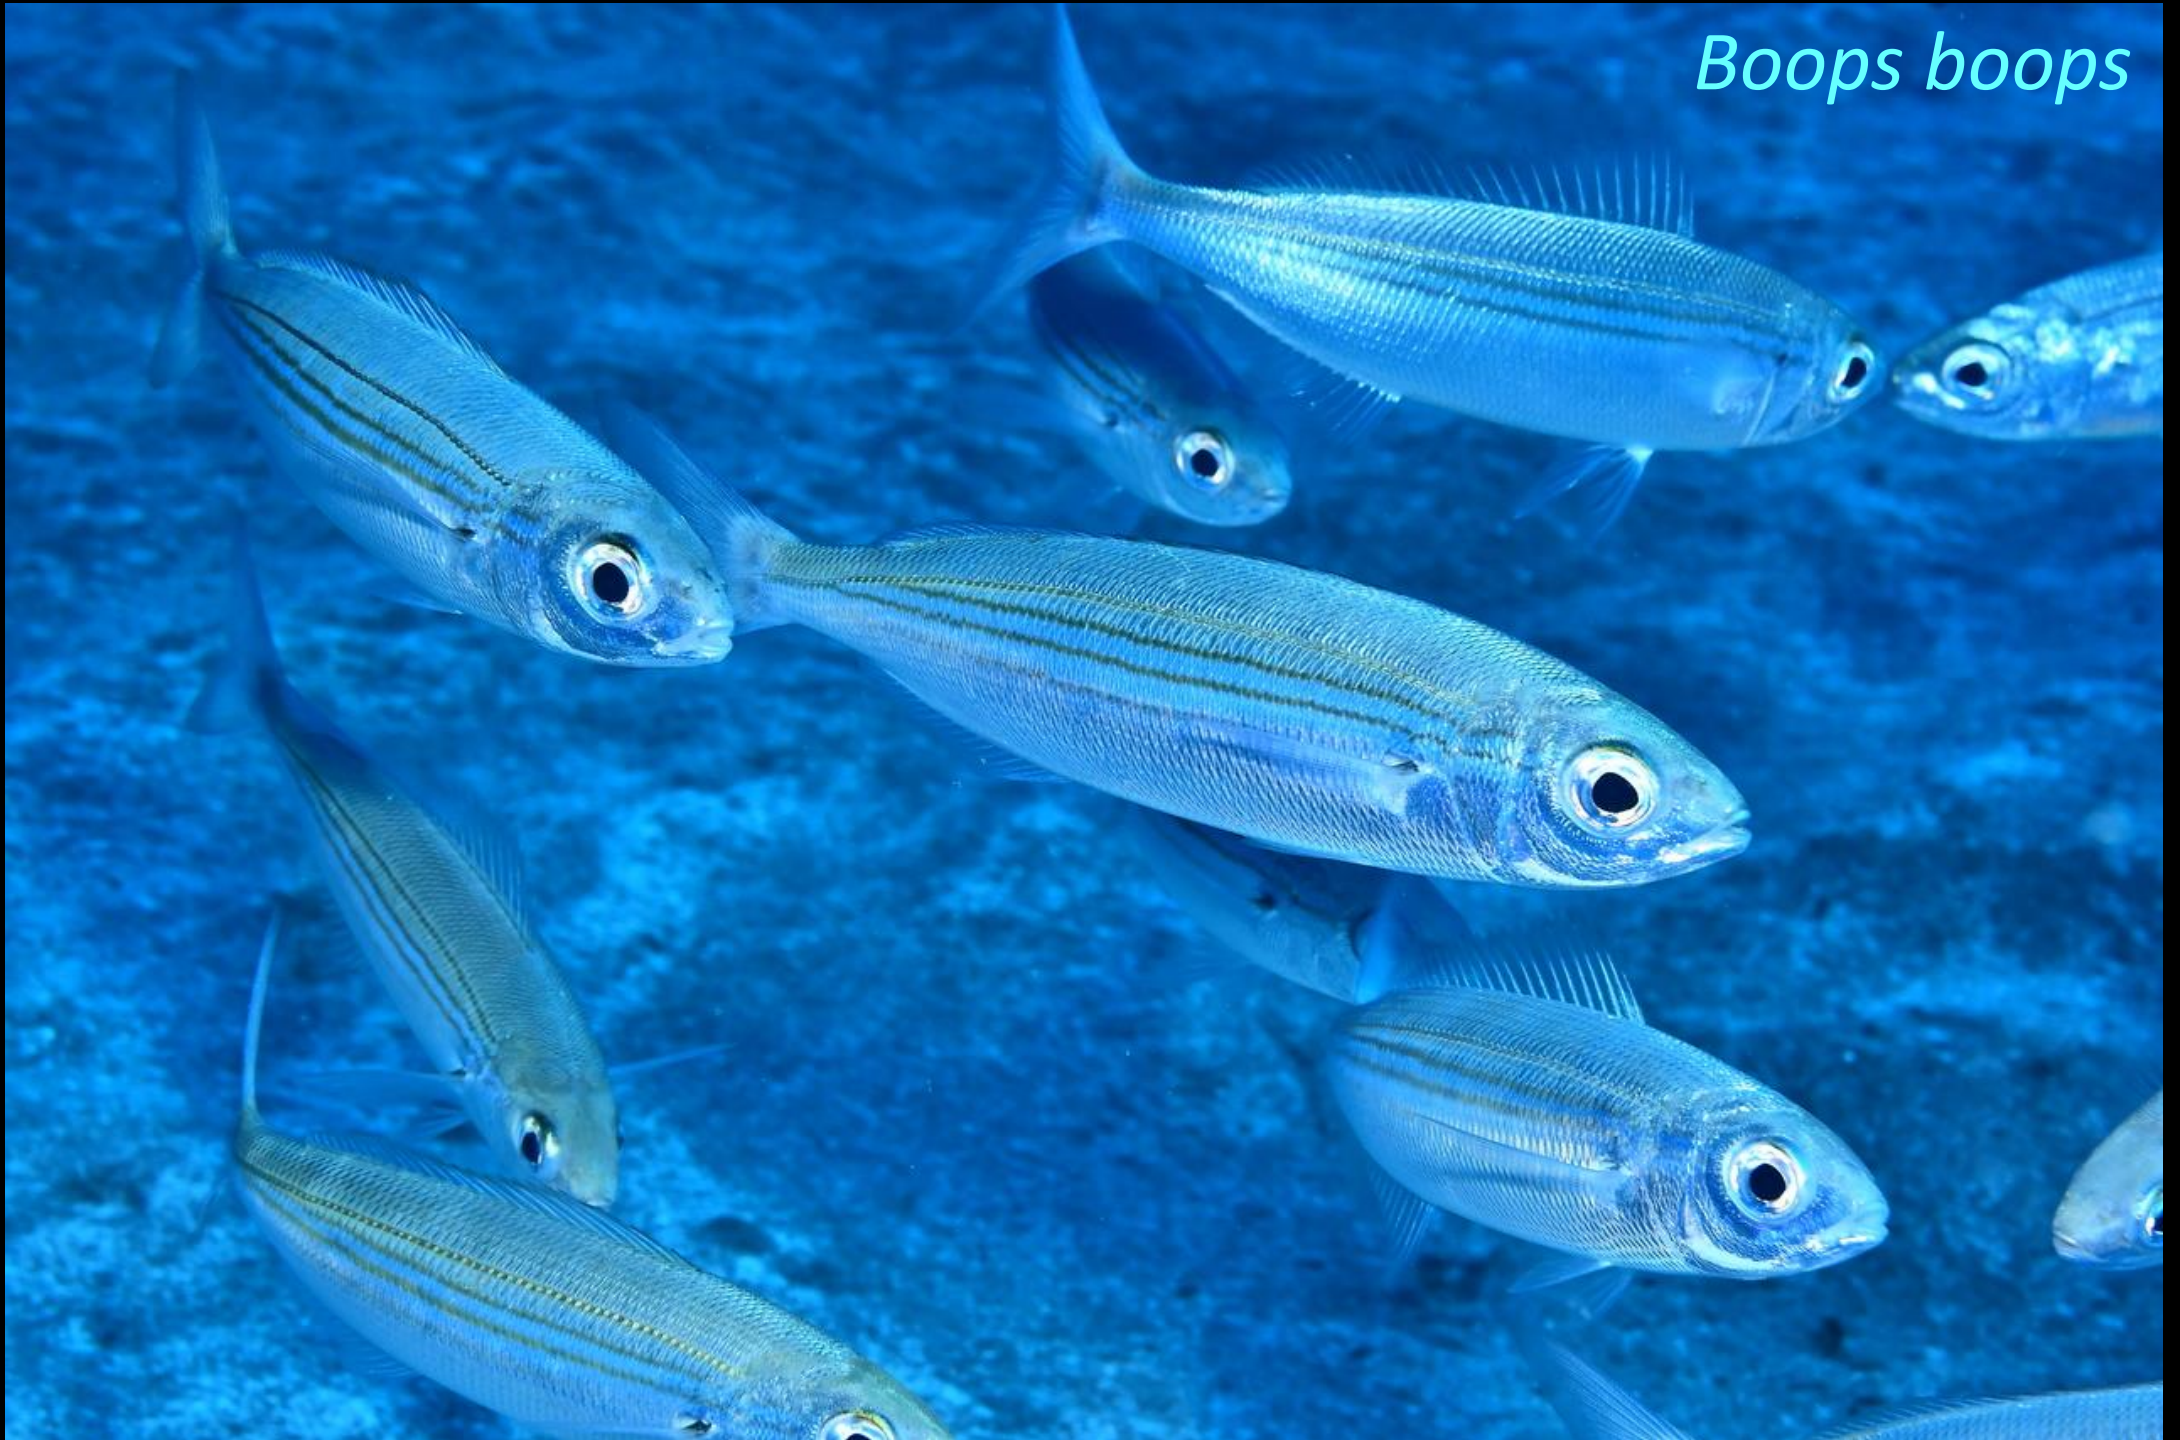

Aulostomus strigosus

Belone belone gracilis

Boops boops

Bothus podas maderensis

Canthigaster capistrata

Chelidonichthys lastoviza

Chromis limbata

Clupeidae

Coris melanura

Dasyatis pastinaca

Dentex gibbosus

Didogobius kochi

Diplodus cadenati

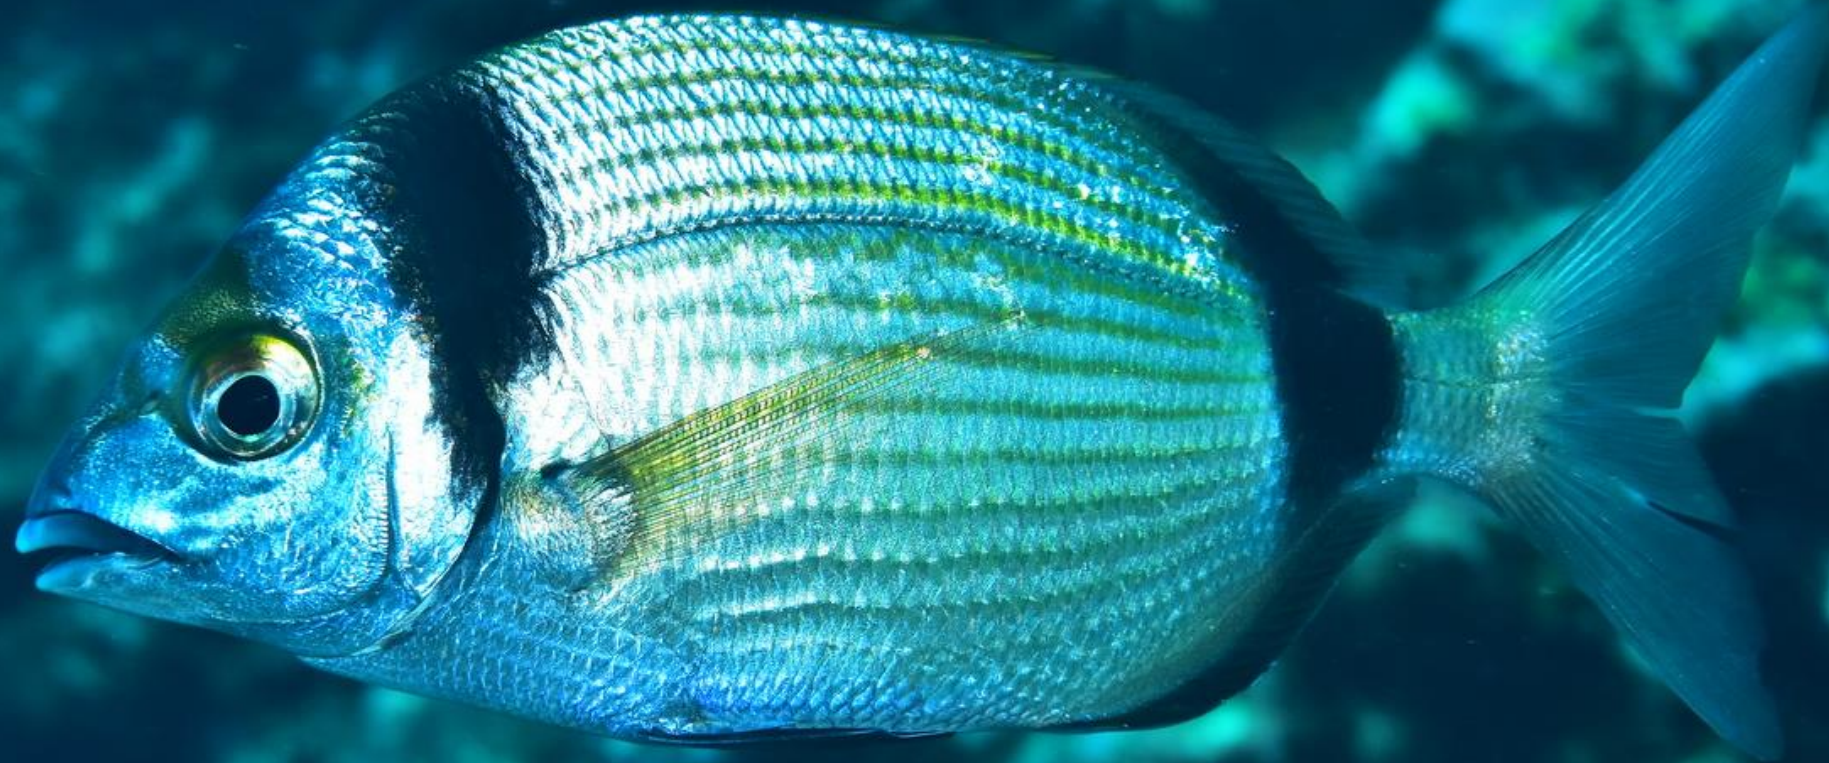

Diplodus cervinus

Diplodus puntazzo

Diplodus vulgaris

Echiichthys vipera

Enchelycore anatina

Epinephelus costae

Epinephelus marginatus

Gnatholepis thompsoni

Gobius paganellus

Gymnothorax unicolor

Gymnura altavela

Heteroconger longissimus

Heteropriacanthus fulgens

Hippocampus hippocampus

Kyphosus sectatrix

Labrisomus nuchipinnis

Lipophrys trigloides

Lithognathus mormyrus

Mauligobius maderensis

Microlipophrys velifer

A photograph of a school of fish, likely Mugilidae, swimming in clear, blue water. The central fish is a large, elongated species with prominent horizontal stripes and a large, fan-shaped caudal fin. It is surrounded by several smaller, more compact fish with similar striped patterns and prominent eyes. The background is a soft-focus view of the underwater environment.

Mugilidae

Mullus surmuletus

Muraena augusti

Mycteroperca fusca

Oblada melanura

Ophioblennius atlanticus

Pagellus acarne

Pagellus erythrinus

Pagrus auriga

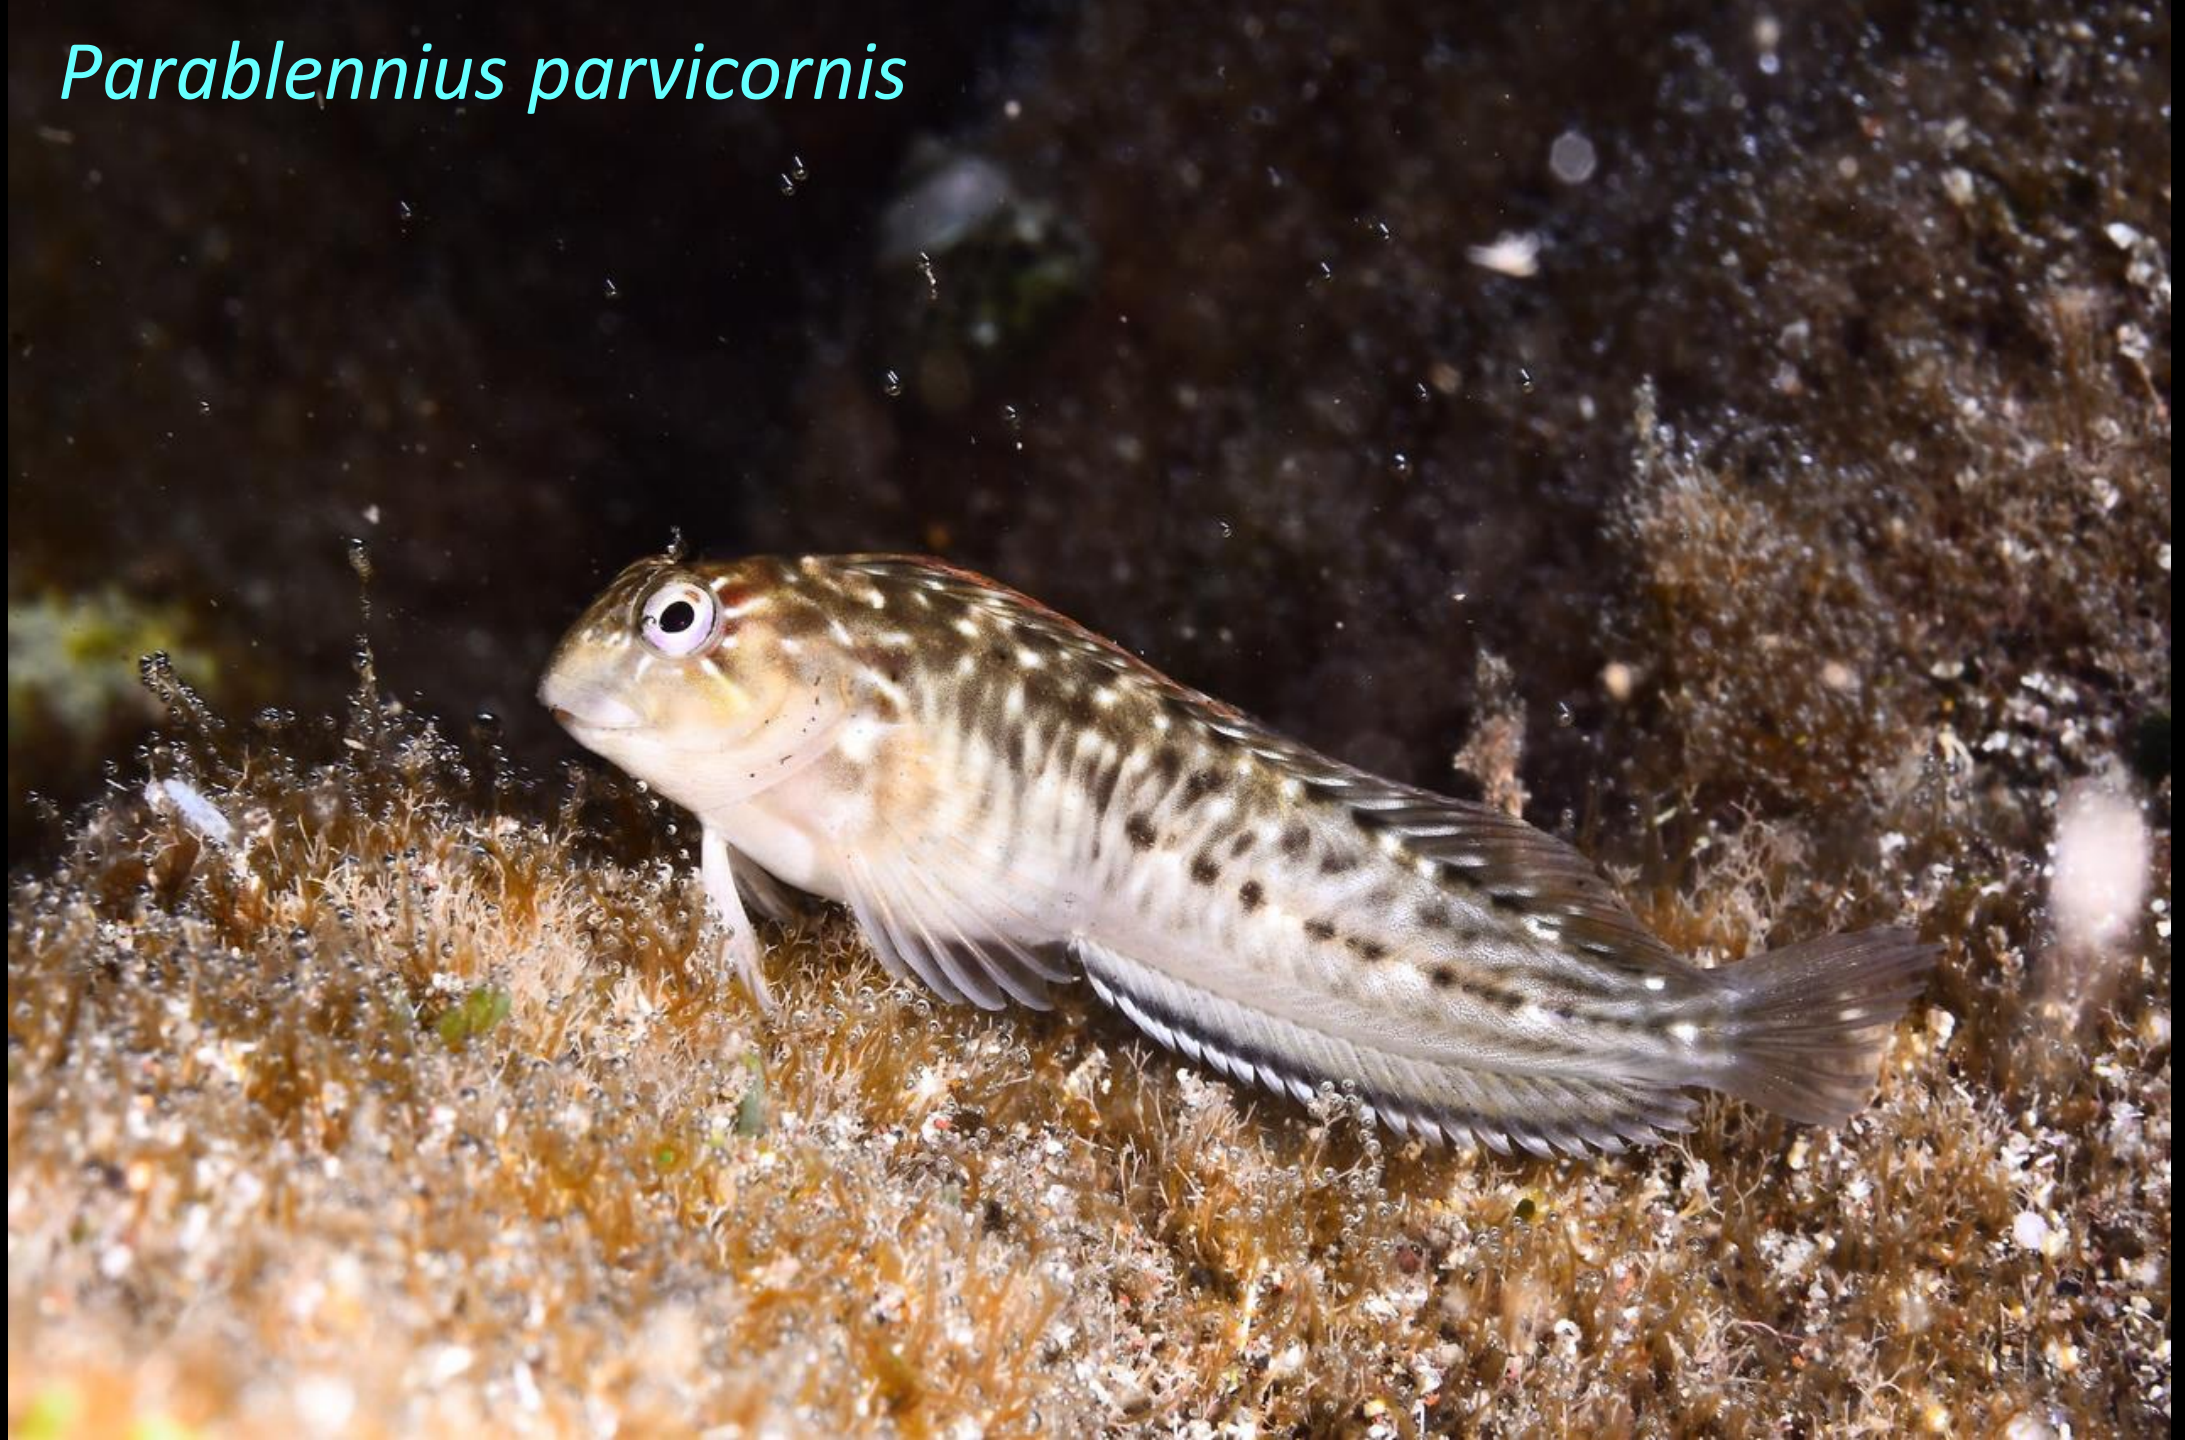

Pagrus pagrus

Parablennius goreensis

Parablennius parvicornis

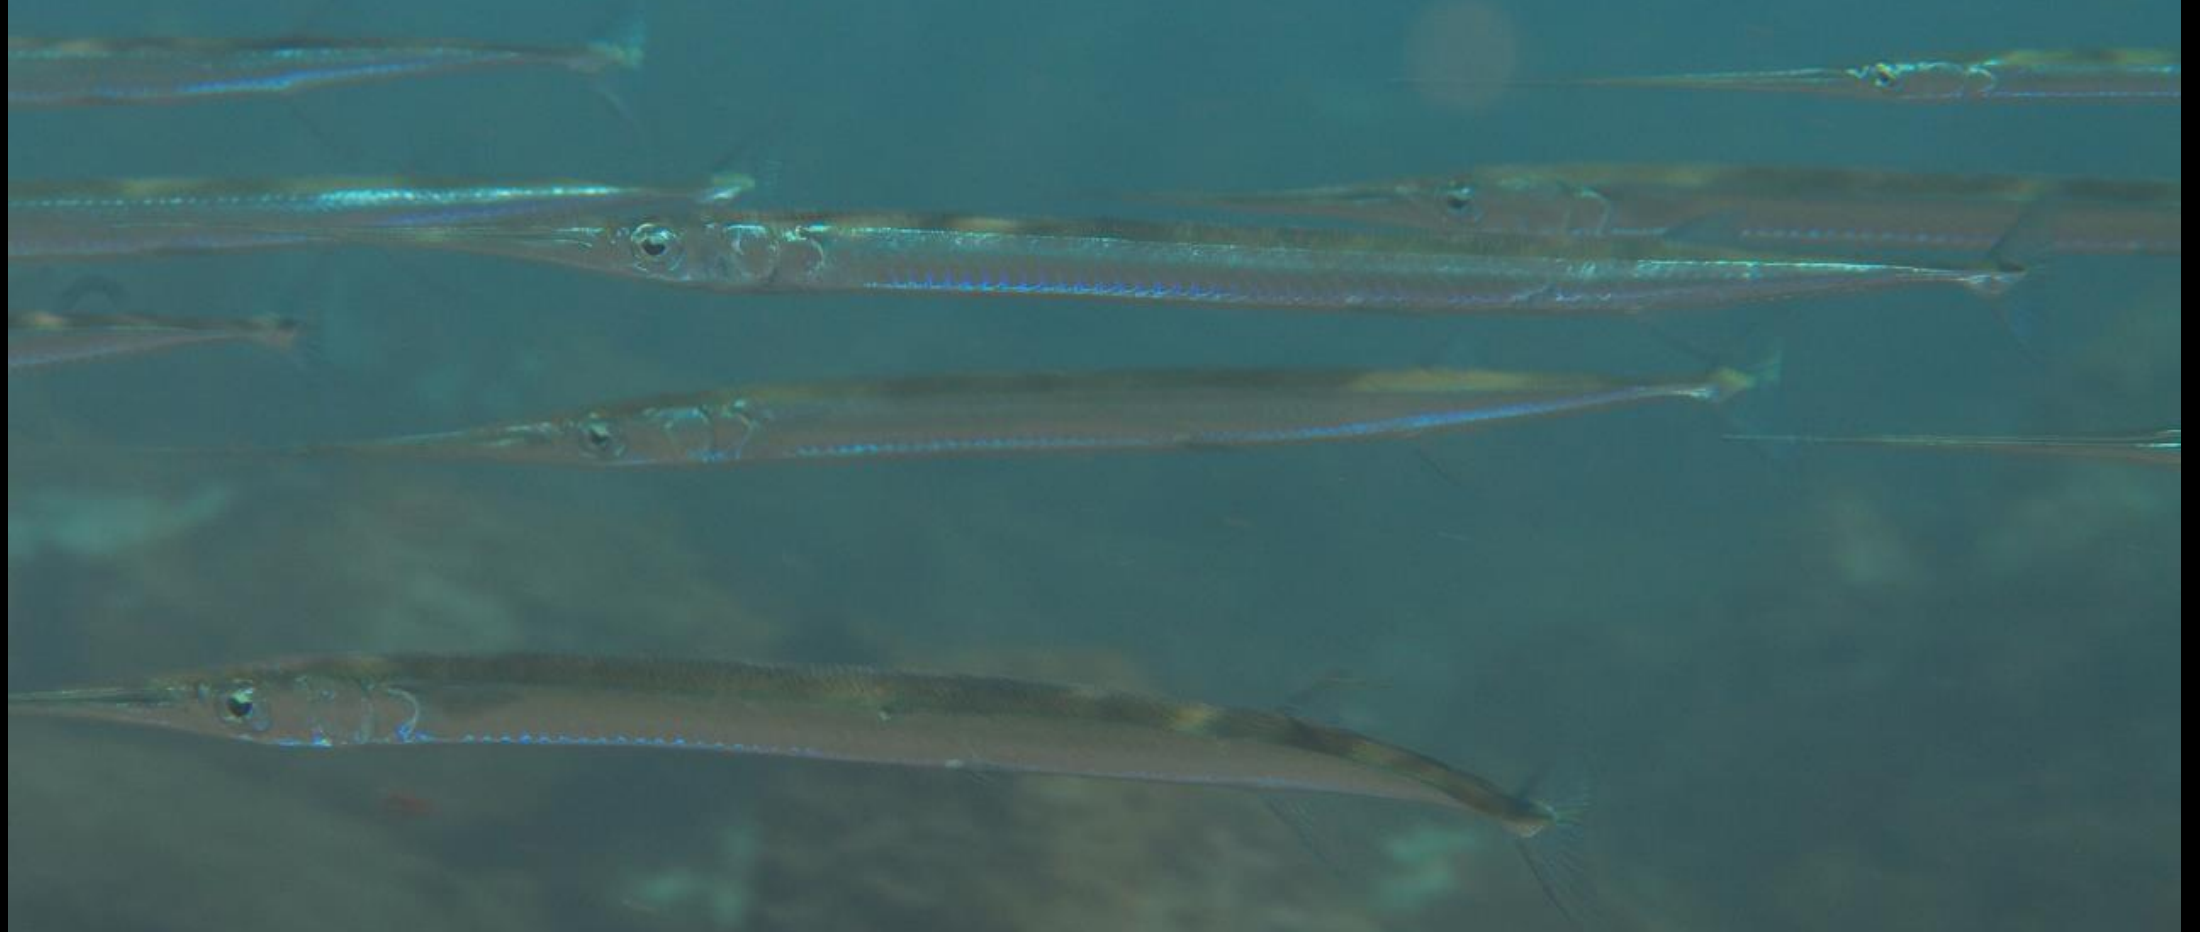

Parablennius pilicornis

Parapristipoma octolineatum

Platybelone argalus

Pomadasys incisus

Pomatomus saltatrix

Pseudocaranx dentex

Sarda sarda

Sarpa salpa

Scartella cristata

Scorpaena maderensis

Scorpaena notata

Scorpaena porcus

Seriola dumerili

Serranus atricauda

Serranus cabrilla

Serranus papilonaceus

Similiparma lurida

Sparisoma cretense

Sphoeroides marmoratus

Sphyraena viridensis

Spondyliosoma cantharus

Squatina squatina

Stephanolepis hispida

Symphodus trutta

Syngnathus typhle

Synodus saurus

Synodus synodus

Taeniura grabata

Thalassoma pavo

Torpedo marmorata

Trachinotus ovatus

Trachinus draco

An underwater photograph showing several fish, identified as *Trachurus* sp., swimming in a deep blue environment. The fish are silvery with a prominent dark lateral stripe. They are positioned around a large, brown, feathery seaweed or coral structure that dominates the center of the frame. One fish is in the upper left, another in the upper right, and a larger one is in the center-left. A fourth fish is partially visible in the bottom right corner. The lighting is somewhat dim, typical of an underwater scene.

Trachurus sp.

Tripterygion delaisi

Umbrina canariensis

Umbrina ronchus

Vanneugobius canariensis

Xyrichtys novacula
